

PELLET PATIO HEATER

Hanks Patio Heater is a stove that uses biomass pellets as fuel. Boasting high efficiency, environmental friendliness and convenience, this type of pellet stove holds an important place in outdoor activities.

In today's pursuit of a high-quality outdoor life, the patio heater, as an emerging outdoor heating device, is gradually gaining increasing popularity among outdoor enthusiasts and household users. It not only provides warmth and comfort for outdoor activities but also serves as a symbol of a fashionable and practical lifestyle. Hanks focuses on the functionality and practicality of its products, striving for the perfect combination of performance and durability. By closely incorporating users' feedback and needs, we constantly refine and optimise our product design to ensure that users can enjoy the best experience in outdoor activities. Now, we are delighted to present our latest patio heater products.

OUTDOOR HEATER FIRE PIT

- * 3 MODES, 1 UNIT: Choose between three unique modes to match your mood— flame only, heat only, or flame and heat.
- * PROPANE FIRE PIT: Create the perfect ambiance with full flame control - perfect for warm evenings when you want the firepit aesthetic but don't need the extra heat.
- * POWERFUL OUTDOOR HEATER: Cozy up on the patio with just heat, no flame. Ideal for windier days or chilly evenings when warmth is desired.
- * 80,000 BTUS OF COMBINED HEAT & FLAME: Use the Ambient Flame Mode and Heat Mode together for maximum heat and the perfect ambiance. Total control for everyday use.
- * HASSLE-FREE CONTROL: Ignite, extinguish, and control the flame and heat levels with the turn of a dial—no more waiting for wood to light or burn out.
- * SMOKELESS ENTERTAINING: Enjoy the ambiance of flames without worrying about ashes, cleanup or smoky clothing.
